for success

What you do not know - will hurt you!

BizPipe

A Pipeline Management Program

The intelligent way to develop and manage your Federal Government opportunity pipeline - available for less than a high-end research tool alone will cost you.

With BizPipe, we do the research for you. We pre-screen opportunities, presenting to you what makes the most sense for your market-strategy and pipeline requirements. When approved for pursuit, we place the opportunity into your pipeline database and begin to develop a full analysis of prior expenditures, potential teaming partners/competitors, key government contact points, previous procurement actions, and more. We provide staged pipeline management, pipeline modeling, opportunity assessment (PWin), and data updating throughout the opp-life-cycle.

With BizPipe, you receive access to our Cloud based pipeline management tool that provides for activity planning, action tracking, and reporting. And, one of our BD Specialists will facilitate a bi-monthly pipeline review and assist with teaming.

The best way to make your internal BD efforts more effective.
